| | Not Identified On Field Inspection | |
|---------------------------|---|---|
| Location | Issue Reported | Comment |
| John St near Ocean St | Localised drainage problems | |
| 113 Jersey Rd | Major overland flows and severe flooding during stated events (1984, Jan 87, Jan 89, Apr 89, and Jan 91). (blamed on regrading of park in 1987, barricades now exist diverting flow and have prevented above floor flooding). | |
| 86 Holdsworth St | Above floor flooding due to flows overtopping kerb in Holdsworth Street en route to Jersey Road. | Neither the model results for the 100AR event nor the field inspection indicates any substantial flow down Holdsworth St adjacent to the property |
| 173 Windsor St | Above floor level inundation. | |
| 189 Paddington St | Below floor level inundation due to drainage problems. | |
| 159 Paddington St | Ground seepage enters residence during storms. | Unfeasible to evaluate from visual inspection |
| 133 Windsor St | Above floor flooding due to local drainage problem. | |
| 121 Underwood St | Rising groundwater causes inundation of the basement during major storm events. | Unfeasible to evaluate from visual inspection |
| 1 Tivoli St | Water up to 0.08 m at front of house (89), water tp 0.05 m below floor level (91). | |
| 130 Underwood St | Property inundation to 0.3m, and above floor flooding to 0.05m (89), property inundation to 0.2m (91). | |
| 184 Underwood St | Above floor flooding due to a drainage problem. | |
| 18 Norfolk St | Above house floor level inundation to 0.08 m (has since been averted due to construction of a dwarf wall). | Outdated |
| 21 Paddington St | Water to 0.15 m below floor level. | |
| 14, 28, and 30 Windsor St | Inundation of below ground cellars. | |
| 1 Gurner St | Groundwater seepage due to storm events. | Unfeasible to evaluate from visual inspection |
| 280 and 311 Glenmore Rd | Groundwater seepage due to storm events. | Unfeasible to evaluate from visual inspection |
| Goodhope St | Rows to a depth of 0.15 m above | There is no indication of large flows down Goodhope |
| 29 Lawson St | Above floor level inundation. | The house is situated almost on the crest of a hill, unlikely to be flooded by overland flows. |
| 440 and 450 Glenmore Rd | Above floor level inundation. | |
| 72 Brown St | Rising groundwater, up to 0.2m, after storm events | Unfeasible to evaluate from visual inspection |

REPORTED ISSUES BUT NOT INCLUDED IN FIELD INSPECTION

John St near Ocean St Localized drainage problems

113 Jersey Rd Major overland flows and severe flooding during stated events (1984, Jan 87, Jan 89, Apr 89, and Jan 91). (blamed on regrading of park in 1987, barricades now exist diverting flow and have prevented above floor flooding).

86 Holdsworth St Above floor flooding due to flows overtopping kerb in Holdsworth Street en route to Jersey Road.

173 Windsor St Above floor level inundation

159 Paddington St Ground seepage enters residence during storms.

133 Windsor St Above floor flooding due to local drainage problem

121 Underwood St Rising groundwater causes inundation of the basement during major storm events.

130 Underwood St A Property inundation to 0.3m, and above floor flooding to 0.05m (89), property inundation to 0.2m (91).

184 Underwood St Above floor flooding due to a drainage problem

14, 28, and 30 Windsor St Inundation of below ground cellars

14, 28, and 30 Windsor St Rear

21 Paddington St Water to 0.15 below floor level.

1 Gurner St Groundwater seepage due to storm events.

280 Glenmore Rd Groundwater seepage due to storm events.

Goodhope St Flows to a depth of 0.15m on footpath reported. According to model no flow, but possibly up to $10m^3/s$.

cording

29 Lawson St Above floor level inundation reported, but no potential flows causing it could be found.

311 Glenmore Rd Groundwater seepage due to storm events.

440 and 450 Glenmore Rd Above floor flooding reported, but no clear reason found.

72 Brown St Rising ground water reported after storm events. (Front and rear)

LOCATIONS WHERE PROBLEMS HAVE BEEN REPORTED, BUT NO ISSUES COULD BE IDENTIFIED ON FIELD INSPECTION

John St near Ocean St Localized drainage problems.

113 Jersey Rd Major overland flows and severe flooding during stated events (1984, Jan 87, Jan 89, Apr 89, and Jan 91). (blamed on regrading of park in 1987, barricades now exist diverting flow and have prevented above floor flooding).

86 Holdsworth St Above floor flooding due to flows overtopping kerb in Holdsworth Street en route to Jersey Road.

173 Windsor St Above floor level inundation.

159 Paddington St Ground seepage enters residence during storms.

133 Windsor St Above floor flooding due to local drainage problem

121 Underwood St Rising groundwater causes inundation of the basement during major storm events.

1 Tivoli St Water up to 0.08 m at front of house (89), water to 0.05 m below floor level (91).

130 Underwood St Property inundated to 0.3m, and above floor flooding to 0.05m (89), property inundation to 0.2m (91).

184 Underwood St Above floor flooding due to a drainage problem.

14, 28, and 30 Windsor St Inundation of below ground cellars.

14, 28, and 30 Windsor St Rear

21 Paddington St Water to 0.15m below floor level.

1 Gurner St Groundwater seepage due to storm events.

280 Glenmore Rd Groundwater seepage due to storm events.

LOCATIONS WHERE PROBLEMS HAVE BEEN REPORTED, BUT NO ISSUES COULD BE IDENTIFIED ON FIELD INSPECTION

311 Glenmore Rd Groundwater seepage due to storm events.

Goodhope St Flows to a depth of 0.15m on footpath reported. According to model no flow, but possibly up to 10m³/s.

440 and 450 Glenmore Rd Above floor flooding reported, but no clear reason found.

72 Brown St Rising ground water reported after storm events (front and rear).

1. Ponding & Ground Floor Inundation Low point in road. Ponding and inundation of 126 Queen St reported.

2. Floor Below Road Bar cellar door on Moncur St

3. Ponding Localized flooding reported in Britannia
Ln just off Moncur St

4. Ponding & Flow Diversion Low point in intersection forcing water through park to the right in picture

5. Flow Diversion Flowpath through park

6. Garage Below Road

7. Large Flow Alley way to take 10-20m³/s

8. Garage Below Road Ocean St

9. Garage Below Road Ocean St

10. Other Backyard or other properties at rear of building on Ocean St possibly inundated

11. Floor Below Road Ocean St

12. Floor Below Road Ocean St

13. Garage Below Road Ocean St

14. Flow Diversion Possible flow diversion into Tara St from Ocean St, which carries 1-2m³/s.

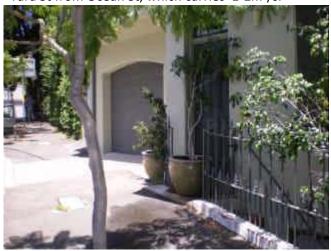

15. Ponding Low point in Tara St

16. Flow Diversion Previously inundated above floor level, but fence and garage now in place to divert flow

17. Ground Floor Inundation Example of surrounding properties that may now be at risk of inundation.

18. Floor Below Road Quarry St

19. Floor Below Road Quarry St

20. Garage Below Road Rear of 204 Jersey Rd

21. Ponding & Ground Floor Inundation Possibly property inundation, but the building is being refurbished

22. Other Carpark on Sutherland Ave potentially

23. Ground floor Inundation Example of property at risk at Sutherland Ave

24. Flow Diversion Possible flow path between the upper part of Harris St and Sutherland Avenue

25 & 26. Floor Below Road Examples of several properties on Sutherland Avenue with floors lower than the road

27. Floor Below Road Example of property on the north eastern end of Elizabeth St potentially inundated

28. Ponding & Flow Diversion Ponding and possibly flow diversion down the slope and over stairs

29. Ponding & Flow Diversion Upper part of Harris Street. Possible flow path (see 30) to left in picture

30. Flow Diversion Possible flowpath to lower Harris Street

31. Flow Diversion Continued flow path

32. Flow Diversion Lower part of Harris Street

33. Flow Diversion Possible flow path off the lower most part of Harris Street

34. No Flow Path Ponding and possibly floor inundation (see 116 for close up)

35. Ground Floor Inundation or Floor Below Road Properties with above floor level inundation recorded. Most likely flow from rear end where Sutherland Ave lies above floor level.

36. Ground Floor Inundation or Floor Below Road
Properties on Harris St with above floor level
inundation recorded. Flow most likely from rear end
(Sutherland Ave)

37. Floor Below Road Rear end of previous properties 38. Floor Below Road One of several propertyies (Sutherland Ave). Walls/fences offers protection from inundation to varying extent

potentially inundated on Sutherland St

39. Ponding & Floor Below Road Low point in road

40. Ponding Low point in Hargrave St.

41. Floor Below Road Low point in Hargrave St. Inundation of lower levels likely for several properties

floor inundation due to large flow on Hargrave St (5-10 m³/s.

42. Ground Floor Inundation Possibly 43. Floor Below Road One of several properties along Hargrave St with floor levels below road level.

44. Ponding & Ground Floor Inundation Low point in road; possibly ponding and inundation above floor level.

45. Ponding & Ground Floor Inundation Low point in George St; possibly ponding and inundation above floor level.

46. No Flow Path/Ponding Drive way off George St.

47. Ponding & Ground Floor Inundation Low point in Elizabeth St; possibly ponding and inundation above floor level(see 49).

48. Garage Below Road

FIGURE B4 SITE PHOTOGRAPHS SHEET E

49. **Ground Floor Inundation** Example of house at risk of being inundated.

50. Ponding & Ground Floor Inundation Low point in Victoria St; possibly ponding and inundation above floor level(see 51).

51. Ground Floor Inundation Example of house at risk of being inundated.

52. Ponding & Ground Floor Inundation Low point in Oxford St; possibly ponding and inundation above floor level(see 53).

53. Ground Floor Inundation Example of properties at risk of being inundated.

54. Ponding & Floor Below Road Low point in Underwood St(see 55).

55. Floor Below Road Example of properties at risk of being inundated.

56. Ponding & Ground Floor Inundation Paddington St (see 57).

57. Flow Diversion Previous reports state water reached a level 0.15 m below the floor at No. 21. The protective walls at both No 21 and 19 could increase problems at adjacent properties.

58. Ponding Low point in Hopewell St(see 59).

59. Floor Below Road Example of properties at risk of being inundated.

60. Garage Below Road 56 Hopewell St.

FIGURE B4 SITE PHOTOGRAPHS SHEET F

61. Garage Below Road & Floor Below Road On Campbell Ave

62. Ponding Intersection Campbell ave\Boundary St

63. Ponding & Ground Floor Inundation Low point in Oxford St

64. Flow Diversion Possible flow path off Oxford St through Kidman Ln

65. Ponding Low point in Oxford St. Footpath reported to have been flooded previously

66. No Flow Path Downhill from Kidman Ln

67. Garage Below Road

68. Flow Diversion Possible flow path from Liverpool St through Boundary Ln to Boundary Street

69. No Flow Path Ponding and possibly floor inundation will occur at the northern end of Prospect St.

70. Garage Below Road The hospital car park could potentially be inundated by waters from Brown St.

71. Ponding Footpath lower than road

72. Ponding Intersection Boundary St\Nield Ave

SITE PHOTOGRAPHS SHEET G

73. Floor Below Road Example of property at risk of being inundated.

74. Garage Below Road

75. Ponding Low point in Cooper St. Water may flow into the reserve and down to Stephen St.

76. Flow Diversion Possible flow path from Cooper St to Stephen St

77. Floor below Road Example of property on Glenmore Rd at risk of being inundated.

78. Ponding & Ground Floor Inundation Example of property at risk of being inundated due to ponding at a low point in Olive St. However, only seepage reported though

79. Ponding & Ground Floor Inundation Low point in Glenmore Rd.

80. Ground Floor Inundation Example of property on Duxford St at risk of being inundated.

81. Ponding Gates blocking flow path down Bennetts Grove Ave

82. Ground Floor Inundation Properties at risk of being inundated on Underwoood St.

83. No Flow Path Ponding in Ashton Lane

84. Ponding Hopetoun Ln low point.

85. Ponding Hargrave Ln low point.

86. Floor Below Road Example of property on Cascade St at risk of being inundated.
