

## Part 7 Environmental Report Card Annual Report 2012/13

# Woollahra Environmental Targets Summary Table 2012:2013

In 2010 the NSW government introduced Integrated Planning and Reporting Legislation. As part of this process Council has reviewed its 'State of the Environment' reporting process to more effectively track sustainability and environmental progress. Council has developed specific targets across five sectors; Energy, Water, Biodiversity, Transport and Waste.

Woollahra Municipal Council's Environmental Sustainability Action Plan (ESAP) was completed in June 2013, and details our targets and actions in each area.

This report outlines progress against our ESAP targets.

## Energy & Emissions

**30% REDUCTION** of greenhouse gas EMISSIONS by: **2025**

**20% REDUCTION** in CONSUMPTION at top sites by: **2017**

**50kW** of RENEWABLE ENERGY installed on Council facilities by: **2017**

+ Emissions REDUCED from 6,679 tonnes in 2011/12 to 6,557 tonnes in 2012/13

+ Total Energy\* use REDUCED from 6,499 GJ in 2011/12 to 6,345 GJ in 2012/13

\*Please note: this does not include Ausgrid streetlight energy consumption

+ Electricity consumption at Council's top sites has REDUCED by **7%**

## Water

**30% REDUCTION** on 2004/05 usage by: **2017**

**80%** of top ten water using sites have STORMWATER harvesting systems by: **2025**

**80%** of top ten water using sites have RAINWATER harvesting systems by: **2025**

+ Total Water use INCREASED\* from 37,266 kL in 2011/12 to 45,510 kL in 2012/13

\*Increased water consumption correlates with dry periods. Sydney experienced low rainfall conditions during 2012/13

+ Project underway for a new STORMWATER HARVESTING SYSTEM at Parsley Bay

## Biodiversity

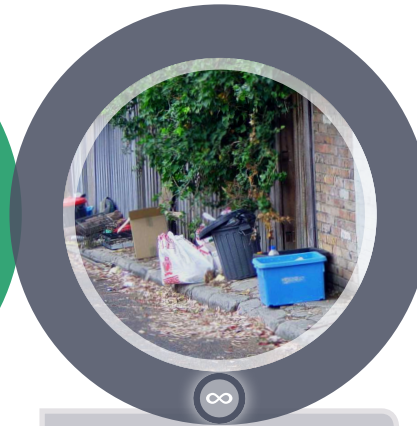

**75%** of BUSHLAND under REGENERATION by: **2017**

**15%** of BUSHLAND FULLY REGENERATED by: **2017**

+ Council's first BIODIVERSITY CONSERVATION STRATEGY has been developed

+ Areas of HIGH BIODIVERSITY VALUE have been mapped

## Waste

**66%** WASTE DIVERSION from landfill by: **2014**

**20%** increase in PUBLIC PLACE RECYCLING by: **2017**

+ CURRENT WASTE DIVERSION from landfill is: **51%**

+ Compost Revolution Project has diverted **138** tonnes of FOOD WASTE from landfill

## Transport

**30 km** of roads within the LGA have DESIGNATED BIKE LANES by: **2025**

**100%** of the cars offered in CARSHARE PROGRAMS in the LGA are FUEL-EFFICIENT VEHICLES by: **2017**

+ **20km** of BIKE LANES have been installed

+ **3** BUS SHELTERS have been upgraded

+ **26** new BICYCLE RACKS were installed at Lyne Park to facilitate use of the ROSE BAY FERRY WHARF
